London 07477342083 talhatwice@gmail.com [linkedin.com/in/talha-shaikh-37030a18b](https://www.linkedin.com/in/talha-shaikh-37030a18b)

Full Stack Engineer with 4+ years building scalable web platforms, API integrations, and cloud-deployed services. Experienced across Node.js, React, and GCP/AWS environments, with a strong bias for delivery and comfort picking up unfamiliar stacks fast. Currently completing an MSc in Big Data & AI, adding machine learning and analytics to a solid engineering foundation.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript/TypeScript, Node.js, React, Next.js, Redux, NestJS, PHP Laravel, Python

Front-End: HTML5, CSS3/SCSS, Bootstrap, Material UI, Figma, responsive UI development

Back-End & APIs: Express.js, REST APIs, GraphQL, microservices architecture, middleware development

E-Commerce & Integrations: Shopify, Magento, Salesforce, PayPal, ERP integration, third-party API connectivity

Cloud & DevOps: AWS (S3, EC2, MediaConvert, IVS, Chime), GCP, CI/CD, GitHub/GitLab

Databases: MongoDB, MySQL, Elasticsearch, SQL stored procedures

AI Tooling: OpenAI APIs, IBM Watson, GitHub Copilot, Cursor, AI-assisted development workflows

WORK EXPERIENCE

Software Engineer, Fascom Limited, Karachi, Pakistan, 07/2022 – 12/2024

- Migrated React platform to Next.js, improving SEO and cutting page load times by 35%.
- Built Node.js middleware and integration services connecting Salesforce, Shopify, and Magento, automating product sync and cutting manual data handling by 60%.
- Integrated AWS S3 and MediaConvert for video upload, storage, and on-demand transcoding; implemented Amazon IVS and Chime SDK for real-time live selling features.
- Deployed to AWS (S3, EC2, IVS, Chime) across production environments with full CI/CD pipeline management.
- Built Elasticsearch-powered data visualisation dashboards for user behaviour analytics, enabling data-driven brand decisions.
- Developed AI-powered Smart Search Engine via OpenAI APIs, improving product discovery and conversion.
- Integrated PayPal and Google AdSense, streamlining checkout and improving ad performance tracking.

Software Engineer, Artistic Denim Mills Ltd, Karachi, Pakistan, 10/2021 – 06/2022

- Developed a custom ERP platform using Node.js/Express, React Redux, and MySQL, replacing Oracle NetSuite and eliminating large annual licensing costs.
- Designed Finance, Products, and Employee Management modules, owning both frontend and backend.
- Built RESTful API and AWS-hosted microservices architecture for faster, scalable data processing.
- Integrated Eclipse BI reporting with React frontend for financial analytics across large datasets.
- Optimised MySQL performance via stored procedures, reducing report generation time by 40%.
- Collaborated closely with finance and HR teams in an Agile setup to automate manual workflows.

Full Stack Developer, Celeritas Digital, Karachi, Pakistan, 03/2021 – 10/2021

- Built a real-time Poultry Farm Management System for a US client using PHP Laravel 7 and AWS EC2.
- Developed an AI-driven chatbot with MERN stack and IBM Watson Assistant, fully automating customer support.
- Contributed to the Techoryze K-12 e-learning platform, improving interactive dashboards for teachers and students using React.js, NestJS, and MongoDB.

EDUCATION

MSc Big Data Processing (AI & Machine Learning), University of Derby, England, Graduation: 2026
Grade: Distinction

- Dissertation: End-to-end retail sales forecasting pipeline using PySpark, MongoDB, LightGBM, and Random Forest on 421,570 records, achieving R^2 of 0.9867.

MS Software Engineering, Muhammad Ali Jinnah University, Pakistan, Graduation: 2022

Grade: CGPA 2.84/4.00

BS Computer Science, Karachi Institute of Economics & Technology, Pakistan, Graduation: 2020

Grade: CGPA 2.86/4.00
